Hello, I'm *Ghazan.*

Full name **Muhammad Dayyan Ghazanfar Latief**. I'm an **Artificial Intelligence Engineering** student at Institut Teknologi Sepuluh Nopember (ITS), passionate about turning complex ideas into impactful digital solutions.

Whether I'm training machine learning models, crafting immersive games, or building intuitive web apps, I thrive on continuous learning and building things I can genuinely be proud of.

More About Me ↓

Work Ethic & Traits

REFLECTION

How I approach my work, along with my key strengths and areas for growth.

Meticulousness, adaptability, and strategic thinking truly define my work ethic. These traits empower me to approach tasks analytically and stay agile under pressure. At the same time, I've also learned to reframe my weaknesses, such as perfectionism, impatience, and spontaneity, turning them into valuable assets that boost my performance.

Strengths

- **Creative Problem Solving:** Finding smart and flexible solutions under pressure.
- **Time Management:** Stay organized by managing time and priorities well.
- **Adaptability:** Adjusting quickly to changes and working in different situations.
- **Cooperative Teamwork:** Collaborating effectively with others to achieve goals.

Areas for Growth

- **Perfectionism:** Can get caught up in details, which I manage by strictly time-boxing tasks.
- **Impatience:** Eager for quick results; I counter this by breaking projects into smaller, rewarding milestones.
- **Spontaneity:** Prone to sudden idea shifts, so I rely on structured planners to stay on track.

Experience

ORGANIZATION

My contributions in events and organizations.

Logistics & Equipment Staff –TC MABA FUN DAY 2025

INSTITUT TEKNOLOGI SEPULUH NOPEMBER | 08/2025

→ Managed and prepared essential equipment and logistics for the freshman orientation event.
→ Coordinated seamlessly with other divisions to ensure all technical and physical requirements were met on time.
→ Handled on-site troubleshooting to maintain a smooth execution of the event's rundown.

Experts Staff of Finance – WONDERKIND FESTIVAL 9

SMA IT DARUL QUR'AN | 08/2022 — 02/2023

→ Contributed to raising around 15% of the total target (approx. IDR 30 million).
→ Managed sponsor outreach, proposal creation, and budgeting support.
→ Handled post-event reporting and ensured sponsor satisfaction.

Event Staff – HEBOH 2023

SMA IT DARUL QUR'AN | 05/2023 — 06/2023

→ Created event rundowns and coordinated with performers and logistics.
→ Assisted in pre-event planning and on-site problem solving.

Skills

TOOLKIT

Things I've picked up along the way.

PROGRAMMING
Python HTML CSS

FRAMEWORKS & LIBRARIES
Pygame Scikit-learn Pandas NumPy

TOOLS
GitHub VSCode MySQL Canva Construct3

Education

BACKGROUND

Where I've been learning.

2024 — PRESENT
Institut Teknologi Sepuluh Nopember
S1 Computer Science — Artificial Intelligence Engineering

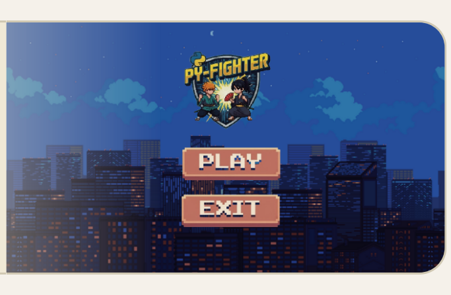
2021 — 2024
SMAIT Darul Qur'an
Islamic Senior High School — Gunung Sindur, Bogor.

Projects

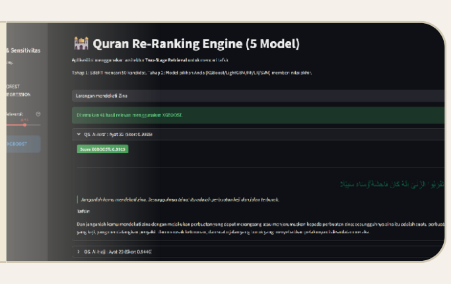
WORK

A few things I've built so far.

🎮 GAME DEV 2025
Py-Fighter
A 2D fighter game built with Pygame — complete with health bars, animations, and local multiplayer.



🤖 AI / ML 2025
Auto-Labeling Query Relevance for Quranic Search
A relevance model for searching Indonesian Quranic verses using single and ensemble learning approaches.

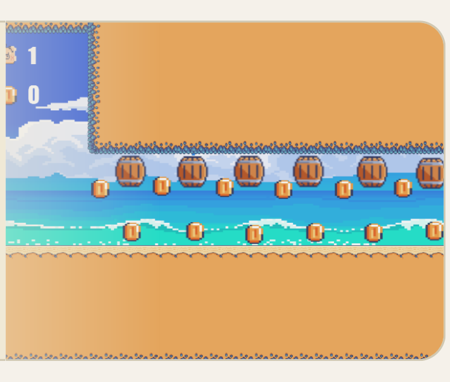


🌐 WEB DEV 2025–2026 IN PROGRESS
Sandikala Kos
A web app for managing a boarding house — tenant records, payments, and room availability in one place.

Sandikala
Selamat Datang di Sandikala Kos
Hunian Premium di Surabaya Pusat

🎮 GAME DEV 2026
Berie's Adventure Seaside
A 2D platformer game built with Construct3 — complete with main menu and win/lose screens.

Play Game ↗



🎮 GAME DEV 2026
Flappy Bird
an arcade-style game focusing on precise one-tap mechanics which moves persistently to the right and a challenging scoring system.

Play Game ↗

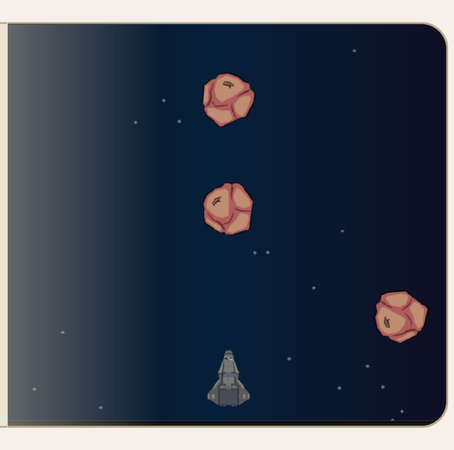
FlappyBird
Get Ready!
TAP
TAP

🎮 GAME DEV 2026 EARLY ACCESS
3D Top-Down Game
A 3D top-down adventure game built with Construct 3.

Play Game ↗

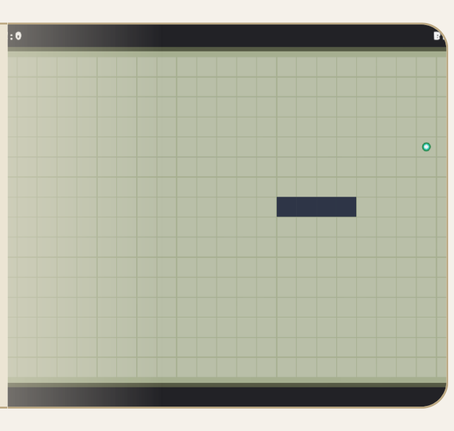
🎮 GAME DEV 2026 EARLY ACCESS
Space Shooter
A fast-paced galactic survival game where players pilot a spaceship to destroy and dodge asteroids.

Play Game ↗



🎮 GAME DEV 2026 EARLY ACCESS
Snake
Reimagining the classic gameplay of Snake Games in Construct 3 with score system and collision detection systems.

Play Game ↗



Future Plans

GOALS

Things I'm actively working towards.

01 🎮
Game Development
Seeking to contribute as a GIGA's Lab Administrator by focusing on optimizing laboratory operations, while diving deeper into game development to create more engaging, interactive games.

02 🌐
Web Development
Build real-world web applications — from personal projects to freelance work — deepening my skills in HTML, CSS, and modern frameworks.

03 📄
Improve My GPA
Raise my transcript average by showing up harder each semester and truly understanding the material.

04 💰
First Income Before Graduation
Start freelancing or contributing to small paid projects — earning my first income before I graduate.

✨ DREAM JOB 01
AI / Machine Learning Engineer
Focusing on building intelligent systems that tackle real-world problems through **Machine Learning**, **NLP**, and **Deep Learning** research.

Predictive Modeling
Natural Language Processing
Neural Networks
Computer Vision

✨ DREAM JOB 02
Game Developer
Dedicated to the technical process of **game creation**—programming core mechanics and crafting immersive digital experiences for players worldwide.

Gameplay Mechanics
Game Logic Design
Interactive Media
User Experience (UX)
